Cybersecurity & Data Protection Statement

TouchPad ELECTRONICS LLC

World class operating standards & regulatory compliance in data security & monitoring

While TouchPad has not yet undergone its scheduled C3PAO certification, our organization maintains an active and internal commitment to cybersecurity. We have adopted the 110 security controls required by NIST SP 800-171, which serve as the foundation for the Cybersecurity Maturity Model Certification (CMMC) Level 2 framework.

Access Control:

Enforcing strict identity verification and least-privilege access across our systems.

Incident Response:

Maintaining a tested incident response plan to quickly detect, report, and mitigate threats.

System Maintenance & Audit:

Regularly monitoring, logging, and auditing network activity to prevent unauthorized access.

Awareness & Training:

Delivering continuous cybersecurity training and specialized role-based education to all personnel regarding insider threats.

Personnel Security:

Ensuring our team undergoes continuous security awareness and insider threat training.

Risk Management:

Conducting routine risk assessments and maintaining a Plan of Actions & Milestones (POA&M) to address and track any security gaps.

Awareness and Training:

Delivering continuous cybersecurity training and specialized role-based education to all personnel regarding insider threats.
